

Self evaluation:

LO1: 4/5

A broad range of requirements has been identified with various qualities and attributes and described in a good amount of detail.

LO2: 3/5

An adequate testing document has been produced with a few chosen requirements to go into more detail about their testing. The testing strategy is described clearly.

LO3: 3/5

A fair amount of testing has been performed for the chosen requirements and the produced results are discussed in a good amount of detail.

LO4: 4/5

Limitations and gaps in the testing process have been identified and discussed in detail how these problems can be solved. As well as how the identified targets can be met for each of the requirements and beyond.

LO5: 4/5

The pipeline has been constructed and described in a good amount of detail, clearly explaining every step, limitations and the potential problems that could arise with it.
